Bio-Based Eco-Friendly Products

In your home make sustainability part of everyday life with earth friendly bio products.

Great Utility : Made with coffee, rice & wheat husk and woods in natural colors, these bio products will make your experience of having meals and drinks so much better.

Premium Quality : These are made with our proprietary, biocomposite technology with good durability. They are 100% food contact safe and also microwave & dishwasher safe.

Earth Friendly : They are made from re-purposed bamboo, rice, coffee & wheat husk and food-safe binders. They can be recycled at the end of their current use. Hence, they support circularity from product design to its end of life. This enables us to conserve resources available on our earth.

Climate Friendly : Re-purposed bamboo, rice, coffee & wheat husk locks the biogenic carbon in these products. As a result, the carbon footprint is significantly lower, supporting our fight against climate change.

Community Friendly : From sourcing crop residue to manufacturing these products, we create value for farmers and factories working on the development of rural communities. Toxic chemicals are neither used nor discharged while making these bio products.

Light Weight & Easy to Use : They are lightweight and easy to use. They do not chip or break under normal use. Can be washed gently with a hand/sponge and mild soap.

MADE FROM AGRICULTURAL WASTE, CROP RESIDUE & FOOD-SAFE BIO BASED BINDERS

By choosing our eco-products you knowingly, unknowingly contribute to

- Reduce plastic pollution
- Reduce climate change
- Support farmer's welfare
- Preserve the planet
- Encourage sustainability
